iridium connected

Iridium 9555

Terrestre Véhicule Maritime Aérien Voix SMS

- **Phone calls and SMS**
- **Global coverage including poles**
- **Sending and receiving SMS messages and emails**
- **Can be connected to an external antenna & docking station**
- **Portable and very easy to implement**

The compact satellite for truly global coverage

The Iridium 9555 is a compact, reliable and easy-to-use satellite phone, offering 100% global coverage, including at the poles – an exclusive feature of the Iridium network.
Ideal for professionals working in remote areas, it allows you to make calls and send SMS messages anywhere in the world, in a lighter and more ergonomic format than its predecessors.

Robust and designed for harsh environments, it features:
With a solid battery life (up to 4 hours talk time and 30 hours standby time)
With a built-in speaker, a headphone jack, and a USB-C port for added flexibility
Voicemail, email and SMS functions.

The 9555 integrates easily into all situations: humanitarian missions, expeditions, security, industry, or maritime. It remains a reliable choice for those seeking dependability, simplicity, and global reach, without compromise.
