

Iridium 9555

- > Low speed telephony and data transmission
- > Worldwide coverage including poles
- > Sending and receiving SMS and emails
- > Can be connected to an external antenna and docking station
- > Portable and very easy to use

IRIDIUM - Iridium 9555

The Iridium 9555 cell phone is a lightweight satellite phone, compact and easy to use. Does not require antenna pointing. It has a backlit screen and a mini USB interface for easy connection to a PC.

The sound quality and the capacity of the messaging system have been improved, especially for the weather file retrieval.

The 9555 is sold with a complete set of accessories to facilitate its use in all situations.
